WORK EXPERIENCE

SENIOR - REACT DEVELOPER

GFT - DBS SINGAPUR BANK

From March 2022 to Dec 2022

TECHNOLOGIES: React, React Redux, Typescript, Redux Thunk, Redux Saga, Unit Testing, Git, Confluence, Agile Kanbas.

COMPANY: DBS is the largest east side bank, located in Singapur. We developed a new application in React Ecosystem in order to replace their current app.

MAIN TASKS:

1. Team of five developers (one of the two senior roles).
2. Worked with teams from Asia (more than 10 distributed in Singapore, India, China, and Spain).
3. Development of Micro Front Ends and New Features for the existing ones.
4. Bug fixing.
5. Refactor legacy code.

MAIN ACHIEVEMENT:

Refactor the Modals Logics for the entire application.

1. Recollect and organize all the information concerning the modals logic. This phase included meetings with different Tech Leads and API developers from Singapur, China, and India.
2. Develop a new logic based on React Hook's implementations and separate concerns.
3. Write and organize the US and respective tasks for the development.
4. Manage a team of three people (four with me included) for make the refactor.

SENIOR - REACT DEVELOPER

GreenPower Monitor

From July 2019 to March 2022

TECHNOLOGIES: React, Typescript, Unit Testing, Jest, Git, Confluence, Microsoft Azure, Agile Scrum.

COMPANY: Green Power Monitor is part of the DNVGL group which is focused on renewable energy monitoring. I was part of three teams that developed a couple of libraries in React and Typescript for replacing a Clojure script application progressively with React Widgets.

MAIN TASKS:

1. Created Front - End Widgets, separating concerns in business logic, render logic, and interfaces (typescript).
2. Bug fixing.
3. Replacement into Clojure environment.
4. Hosting and organizing the React Chapter, a weekly meeting for discussing practices on React, challenges, and better ways to code.

MAIN ACHIEVEMENT:

1. Hosting the React Chapter and Chapters on Unit Testing.
2. Re-thinking HighCharts: HighCharts library lacked of a feature required by the client and we thought, test and develop it by creating an algorithm adjusted to our needs and using HighCharts API.

SENIOR - FULL STACK DEVELOPER

TAPPX-THE APPS DEVELOPER COMMUNITY

From July 2017 to July 2019

TECHNOLOGIES: PHP, Laravel, React, Vue.js, JQuery, Git, Confluence.

COMPANY: TAPPX is a company specialized in advertisement in mobile applications.

MAIN TASKS:

1. Development of internal tools for measuring data and administrative issues.
2. Renewal of their main website.

MAIN ACHIEVEMENT:

1. Development of two apps based on Laravel and Vue.js and React.js (FE and BE).
2. Start the Agile Methodologies implementation.
3. Start the documentation process.
